Education

Hong Kong University of Science and Technology(HKUST) <i>Ph.D. of AI for Multimedia, supervised by Prof. Yunya Song and Prof. Anyi Rao</i>	Sep. 2025 – Present
	Hong Kong, China
Nanyang Technological University(NTU) <i>M.Sc. of Artificial Intelligence</i>	Jan. 2023 – Jul. 2024
	Singapore, Singapore
The Chinese University of Hong Kong(CUHK) <i>B.Sc. of Computer Science</i>	Aug. 2018 – Jul. 2022
	Hong Kong, China

Career

Huawei Singapore Research Center - Search and Recommendation Lab <i>AI Research Engineer</i>	May 2024 – Now
	Singapore, Singapore
<ul style="list-style-type: none">• Researched to enhance multimodal models for solving geometric math problems by employing techniques such as meta-learning with Chain-of-Thought and Low-Rank Adaptation, in-context learning with Retrieval-Augmented Generation, and utilizing a novel dataset sourced from Chinese high school educational websites. Published and presented findings at the LGM3A workshop of ACMMM24.• Collaborated on optimizing text-to-image generation strategies to improve output quality, align with user preferences, and reduce the risk of generating inappropriate content. Implemented techniques like Reinforcement Learning from Human Feedback and Retrieval-Augmented Generation. Successfully tested internally at Huawei, resulting in plans for deployment on HarmonyOS as a core AI feature in the coming year.	

Internships

Huawei Hong Kong Research Center - AI Framework & Data Tech Lab <i>Research Intern</i>	May 2023 – Aug. 2023
	Hong Kong, China
<ul style="list-style-type: none">• Developed and executed tensor native graph algorithms on distributed systems, leveraging parallel computing techniques. This implementation significantly enhanced algorithm performance, achieving a speed comparable to Nvidia's Rapids' Cugraph package, with only a minimal 5% reduction.	
SmartMore - Tool-chains Group <i>Computer Vision Algorithm Engineer Intern</i>	Jun. 2022 – Dec. 2022
	Shenzhen, China
<ul style="list-style-type: none">• Analyzed industrial image data and preprocessed datasets based on defects with multiple data augmentation methods to enlarge the dataset and add variance to data, therefore enhancing the model's robustness and prediction accuracy.• Improved SmartMore's SMAP codebase, a full-functional modularized AI training codebase, by adding new features such as label area filter, multi-channels image augmentation, and auto machine learning (hyper-parameter search).	

Research Experience

Point-cloud-based Scene Augmentation, Master Research Project <i>Supervised by Guosheng Lin (Assoc. Professor, NTU)</i>	Jan. 2023 – Nov. 2023
	Singapore, Singapore
<ul style="list-style-type: none">• Developed a novel multi-modal deep neural network for 3D scene augmentation based on text instructions. Applied diffusion model and cross-attention mechanism to generate realistic and consistent objects in the desired locations.	
Multi-task Image Restoration <i>Supervised by Congduan Li (Assoc. Professor, Sun Yat-sen University)</i>	Jun. 2021 – Aug. 2021
	Guangzhou, China
<ul style="list-style-type: none">• Applied data augmentation methods to enlarge the training dataset. Programed the AI agents based on Multi-task Learning with Multi-gate Mixture-of-Experts (MMoE) in Pytorch.
